

Case Study

Migrating IT Infrastructure to Azure and Office 365

OVERVIEW

Today, the whole world is facing a little setback due to the pandemic situation. And this has affected the economy of various countries. As many organizations have started to apply policy of remote working, still many organizations are not able to stand-up against the crisis due to unavailability of such IT infrastructure.

Microsoft Azure and Office 365 are such two powerful solutions which has helped many SMEs to get back on their feet and create a collaborative relation with their peers, customers, and industry leaders.

An experienced (est 1964) and reputed CA firm based out of Ahmedabad, Gujarat. The firm is a professional services' firm offering services across auditing, taxation, international taxation, valuation, business advisory, management consultancy, among other service lines, for which it is a thought leader.

Finance
(Chartered
Accountants)

Client Location

Ahmedabad,
Gujarat

Employees

Over 100
employees

Solution Offered

- Microsoft Azure VM
- Microsoft Azure AD
- MFA
- SSO
- Microsoft 365

CHALLENGES

Since they are into auditing, taxation and various other legal businesses, for them the compliances and data security are the utmost priority.

The solutions or software they use are mostly windows based and hosted on-premise hence guaranteeing server uptime and ISP reliability was a major concern as their servers are used to file GST and upload other legal data onto govt sites on behalf of their clients.

During this global pandemic situation, the remote work and collaboration between internal team have become a bottleneck.

Their management team understood that remote collaborations cannot be handled just by phone calls and emails. So, they needed a different approach

SOLUTION

- Windows Azure Virtual Machines made it possible to quickly create and replicate their on-prem environment
- onto cloud in just 24 hours with no down time.
- M365 (formerly Office 365) become a game-changer for them. Today their internal team collaborates better
- using MS Teams, OneDrive for Business, Planner and other offerings from M365 suite.
- Azure AD solved their security compliances. Today, they connect to all their Microsoft services and Azure
- from their registered devices by passing through another layer i.e., Multi Factor Authentication (MFA) and use SSO

INTECH DIFFERENCE

With this exercise completed keeping security as the utmost priority, they now enjoy much greater flexibility, collaboration and agility along with the high availability and optimum performance assurances they were seeking.
