AI-Ready Manufacturing with Business Central in 10 Weeks

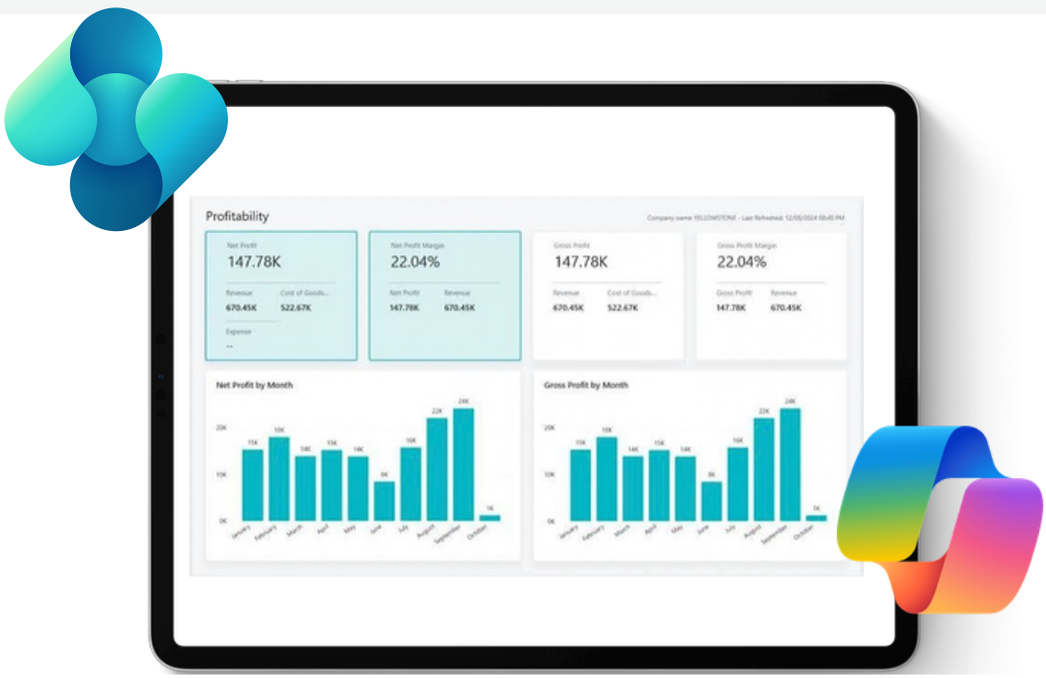

Connect production, inventory, planning, and manufacturing operations in Microsoft Dynamics 365 Business Central, configured for your business and ready for Copilot and intelligent agents from go-live.

10 Weeks **Defined Business Outcomes** **$49,900**

Overview

Business Central Manufacturing Pro is designed for manufacturers seeking improved visibility and control across production planning, inventory, shop floor execution, and manufacturing operations. In five weeks, Intech enables production management, capacity planning, manufacturing costing, and end-to-end operational visibility within Microsoft Dynamics 365 Business Central. The result is improved production efficiency, stronger planning accuracy, better inventory control, and a manufacturing foundation ready for AI-assisted and agent-led ways of working.

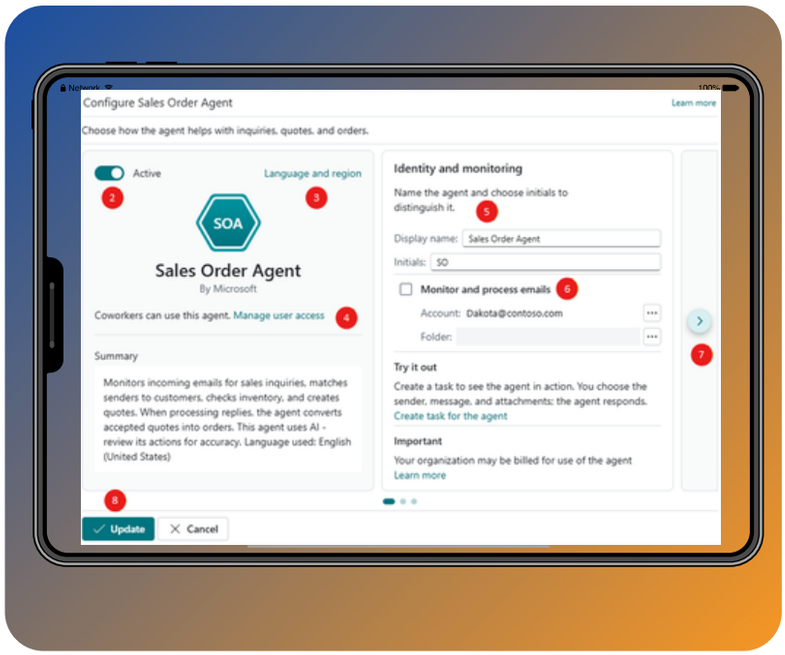

What's Included

- **Financial Management:** Configure the general ledger, receivables, payables, banking, financial reporting, and manufacturing-related financial controls.
- **Operations Management:** Support purchasing, sales, inventory, warehouse management, and order fulfillment activities.
- **Supply Chain Management:** Enable inventory planning, replenishment, procurement optimization, assembly management, traceability, and multi-location inventory control.
- **Production Management:** Configure production orders, manufacturing workflows, status tracking, and production execution processes.
- **Bills of Material & Routing Management:** Set up BOMs, routings, work centers, machine centers, and manufacturing process sequencing.
- **Capacity Planning & Cost Control:** Enable production scheduling, capacity visibility, manufacturing costing, variance analysis, and performance management.

Microsoft Solutions Partner

AI Working from Day One

- **Agent Enablement Included:** Enable Payables, Sales Order, Expense, and operational workflow agents to support everyday business processes. Intech configures the required mailbox, permissions, approval workflows, and agent tuning within the package timeline.
- **Copilot Chat:** Find manufacturing information, analyze operations, and ask business questions using natural language.
- **Analysis Assist:** Explore production, inventory, capacity, costing, and operational data without repeatedly exporting information into spreadsheets.
- **AI-Assisted Production Planning:** Improve production scheduling and resource utilization with intelligent planning recommendations.
- **Intelligent Suggestions:** Reduce repetitive entry and improve data consistency through AI-assisted guidance.

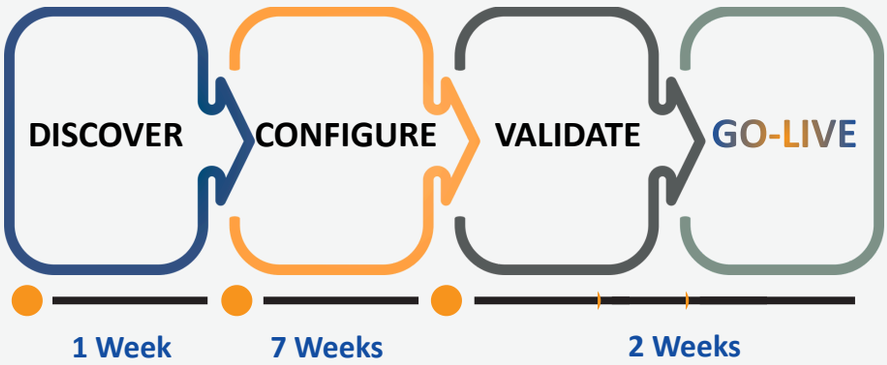

Customer Benefits

- **Streamlined Manufacturing Operations:** Bring production, inventory, planning, and financial processes together within a connected system.
- **Better Production Visibility:** Gain greater insight into production orders, work center utilization, material consumption, and manufacturing performance.
- **Improved Planning Accuracy:** Improve scheduling and production decision-making through connected operational data.
- **Stronger Inventory Control:** Align raw material availability, production demand, and finished goods inventory within a connected manufacturing environment.
- **Improved Productivity:** Use Copilot and standard agents to support everyday manufacturing operations.
- **Lower Implementation Risk:** Adopt Business Central with greater certainty through a defined scope, timeline, and price.

A Clear Path to Go-Live

10-Week Implementation | 80 Hours of Hypercare

Intech Add-Ons to Maximize Personal Productivity

Once your business data is live, the next opportunity is identifying where AI can create value across the wider organization. Project Elevate is Intech's AI adoption program, available as an optional engagement following go-live.

- **Identify High-Value AI Opportunities:** Discover and prioritize AI use cases aligned to business needs and strategic goals.
- **Build a Business Case for AI Adoption:** Assess potential impact, expected value, and organizational readiness before investing.
- **Create a Practical AI Roadmap:** Develop a clear plan for responsible AI adoption with defined priorities and next steps.

Elevate

Intech's ADKAR-based Adoption Program

Business Outcomes You Can Expect

▣	◉	◆	★
Structured Adoption Journey A clear path to move from Copilot access to everyday usage.	**Role-Based Learning** Practical learning connected to real roles and workflows.	**Change-Ready Teams** Teams gain the confidence to adopt new ways of working.	**Measurable Business Value** Adoption outcomes tied to productivity and business impact.

About Intech Systems

As an AI-first Microsoft solutions partner, we help organizations unlock greater value from business applications, data, automation, Copilot, and intelligent agents. With offices in India, the United States, Canada, and Singapore, we serve a global customer base, supporting businesses of all sizes, from ambitious startups to Fortune 500 leaders and unicorns in the making.
