AI-Ready Operations with Business Central in 4 Weeks

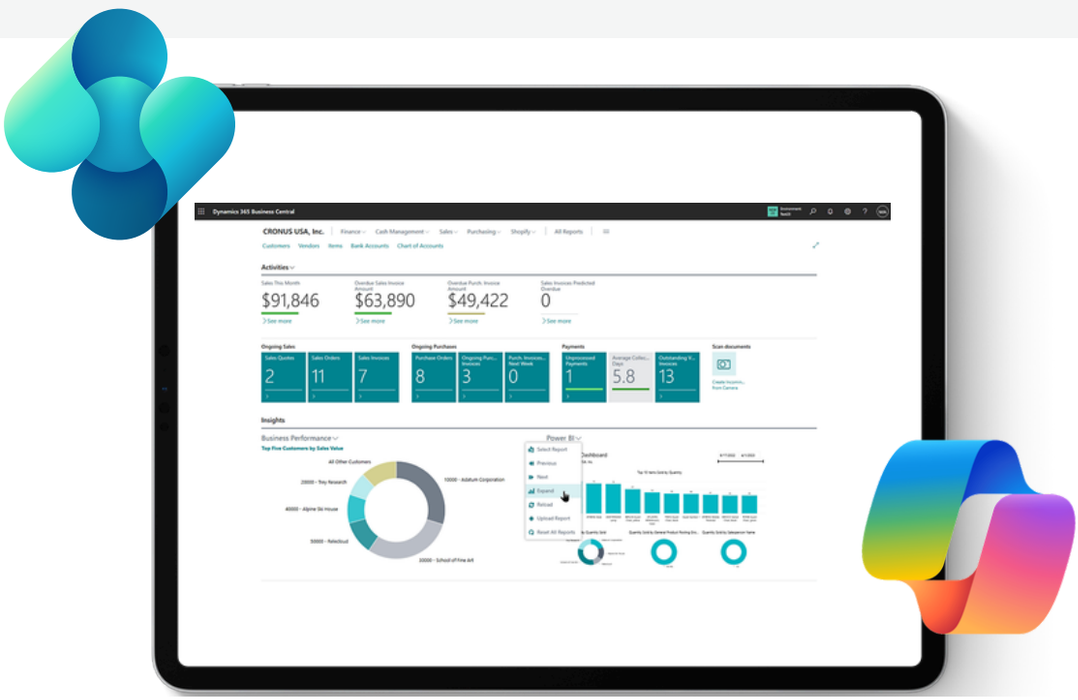

Move beyond disconnected purchasing, sales, and inventory processes with a connected operational foundation in Microsoft Dynamics 365 Business Central, configured for your business and ready for Copilot and intelligent agents from go-live.

4 Weeks **Defined Business Outcomes** **$19,900**

Overview

Business Central Operations Launch is designed for growing businesses seeking greater visibility and control across purchasing, sales, inventory, and warehouse operations. In three weeks, Intech brings core operational processes together in Microsoft Dynamics 365 Business Central. The result is improved inventory accuracy, better order fulfillment, streamlined procurement, and an operational foundation ready for AI-assisted and agent-led ways of working.

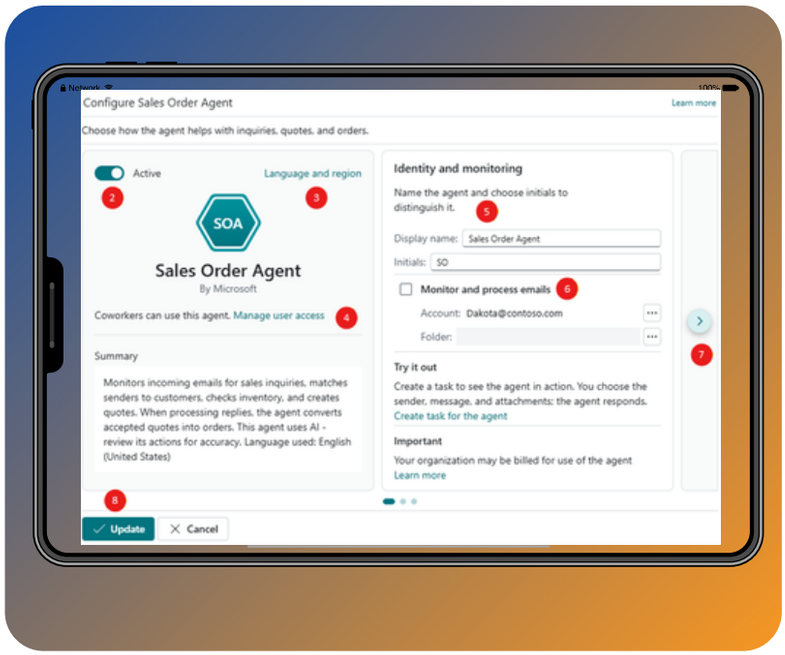

What's Included

- **Financial Management:** Configure the general ledger, chart of accounts, fiscal setup, reporting dimensions, recurring journals, budgets, banking, and financial reporting capabilities.
- **Receivables and Payables:** Manage customer and vendor transactions, invoices, credit memos, cash application, ageing, statements, and related financial processes.
- **Purchasing Management:** Configure vendors, purchase orders, receipts, returns, approval workflows, and purchasing policies within Business Central.
- **Sales Management:** Enable customer records, sales quotes, sales orders, shipments, invoices, returns, and order processing workflows.
- **Inventory & Warehouse Operations:** Set up items, locations, inventory tracking, stock movements, receiving, put-away, picking, and shipping processes.
- **Data Migration & User Enablement:** Move agreed business data into Business Central and prepare key users through guided training, testing, recorded sessions, and structured go-live support.

Microsoft Solutions Partner

AI Working from Day One

- **Agent Enablement Included:** Enable Payables, Sales Order, Expense, and operational workflow agents to support everyday business processes. Intech configures the required mailbox, permissions, approval workflows, and agent tuning within the package timeline.
- **Copilot Chat:** Find records, understand operational information, and ask business questions using natural language within Business Central.
- **Analysis Assist:** Explore inventory, purchasing, sales, and operational trends without repeated spreadsheet exports.
- **AI-Assisted Order Processing:** Accelerate quote-to-cash and procure-to-pay processes with intelligent recommendations and workflow support.
- **Intelligent Suggestions:** Reduce repetitive entry with AI-assisted field recommendations and transaction completion support.

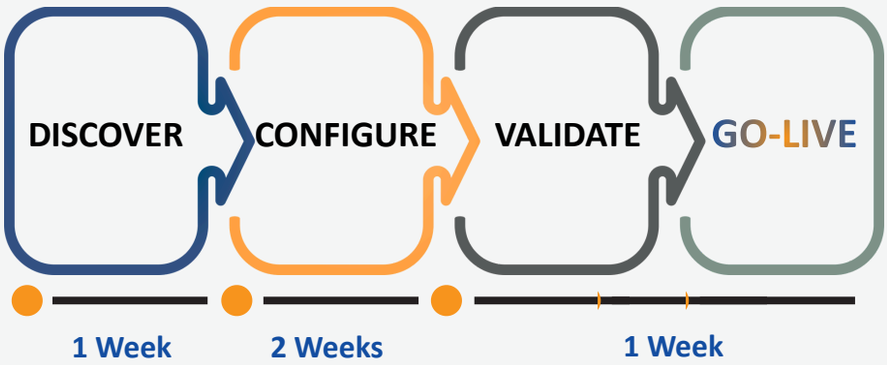

Customer Benefits

- **Simplified Operational Processes:** Move beyond disconnected purchasing, inventory, and sales management activities.
- **One Source of Operational Data:** Create one consistent record across finance, procurement, inventory, warehouse, and customer operations.
- **Improved Inventory Visibility:** Gain greater visibility into stock levels, movements, availability, and replenishment requirements.
- **Faster Order Fulfillment:** Improve order accuracy and streamline fulfillment from order entry through shipment.
- **Improved Productivity:** Use Copilot and standard agents to support everyday operational processes.
- **Lower Implementation Risk:** Adopt Business Central with greater certainty through a defined scope, timeline, and price.

A Clear Path to Go-Live

4-Week Implementation | 40 Hours of Hypercare

Intech Add-Ons to Maximize Personal Productivity

Once your business data is live, the next opportunity is identifying where AI can create value across the wider organization. Project Elevate is Intech's AI adoption program, available as an optional engagement following go-live.

- **Identify High-Value AI Opportunities:** Discover and prioritize AI use cases aligned to business needs and strategic goals.
- **Build a Business Case for AI Adoption:** Assess potential impact, expected value, and organizational readiness before investing.
- **Create a Practical AI Roadmap:** Develop a clear plan for responsible AI adoption with defined priorities and next steps.

Elevate

Intech's ADKAR-based Adoption Program

Business Outcomes You Can Expect

▣ **Structured Adoption Journey** A clear path to move from Copilot access to everyday usage.	◉ **Role-Based Learning** Practical learning connected to real roles and workflows.	◆ **Change-Ready Teams** Teams gain the confidence to adopt new ways of working.	★ **Measurable Business Value** Adoption outcomes tied to productivity and business impact.

About Intech Systems

As an AI-first Microsoft solutions partner, we help organizations unlock greater value from business applications, data, automation, Copilot, and intelligent agents. With offices in India, the United States, Canada, and Singapore, we serve a global customer base, supporting businesses of all sizes, from ambitious startups to Fortune 500 leaders and unicorns in the making.
