AI-Ready Supply Chain with Business Central in 6 Weeks

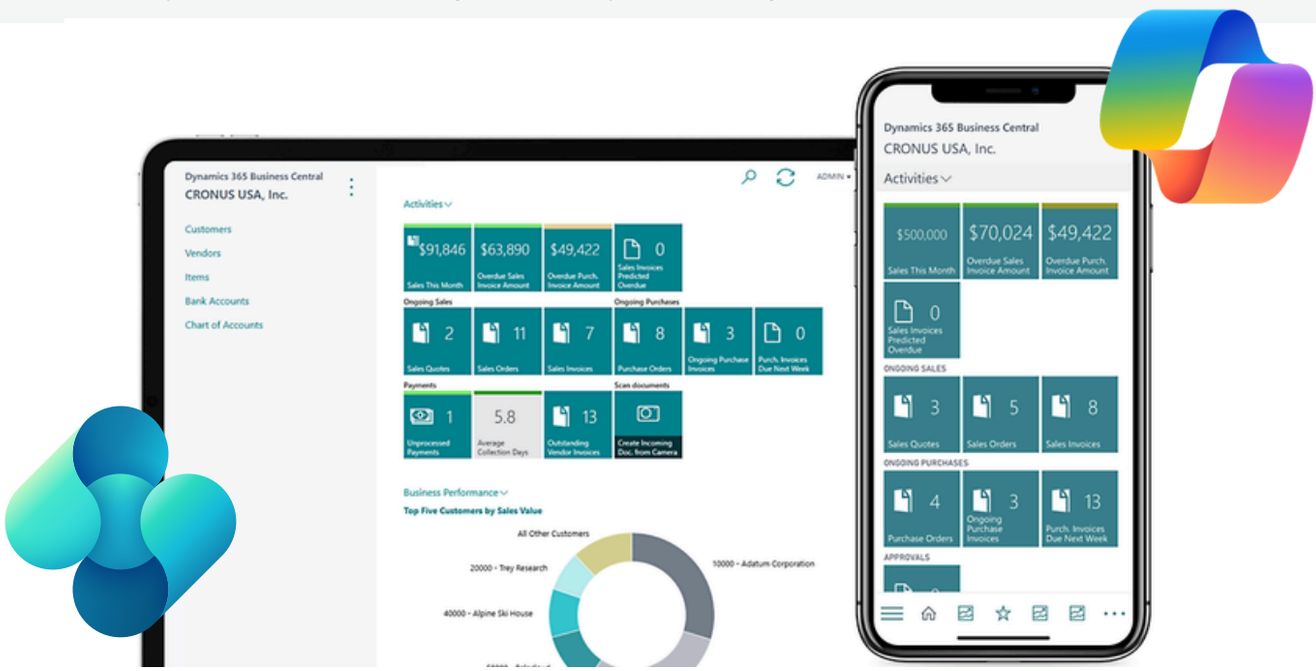

Improve supply chain visibility, optimize inventory performance, and strengthen procurement decisions with Microsoft Dynamics 365 Business Central, configured for your business and ready for Copilot and intelligent agents from go-live.

6 Weeks **Defined Business Outcomes** **$29,900**

Overview

Business Central Supply Chain Pro is designed for organizations seeking greater control over inventory planning, replenishment, procurement, and supply chain performance. In four weeks, Intech extends operational capabilities with advanced planning, inventory optimization, traceability, and multi-location management within Microsoft Dynamics 365 Business Central. The result is better inventory utilization, reduced stock issues, improved service levels, and a supply chain foundation ready for AI-assisted and agent-led ways of working.

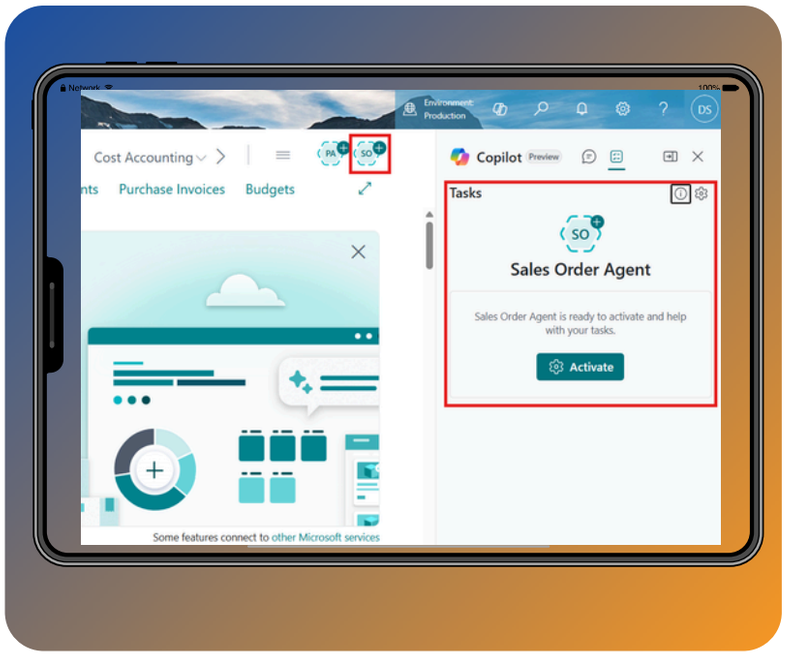

What's Included

- **Financial Management:** Configure the general ledger, receivables, payables, banking, and financial reporting processes.
- **Operations Management:** Support purchasing, sales, inventory, warehouse management, and order fulfillment activities.
- **Inventory Planning:** Configure safety stock, reorder points, planning parameters, and replenishment settings.
- **Procurement Optimization:** Enable sourcing controls, supplier management, purchasing governance, and approval processes.
- **Demand & Replenishment Planning:** Configure forecasting inputs, planning worksheets, replenishment recommendations, and inventory planning processes.
- **Assembly, Traceability & Multi-Location Management:** Support assembly operations, lot and serial tracking, inventory transfers, inventory visibility, and stock optimization across multiple locations.

Microsoft Solutions Partner

AI Working from Day One

- **Agent Enablement Included:** Enable Payables, Sales Order, Expense, and operational workflow agents to support everyday business processes. Intech configures the required mailbox, permissions, approval workflows, and agent tuning within the package timeline.
- **Copilot Chat:** Explore inventory, purchasing, and supply chain information using natural language.
- **Analysis Assist:** Analyze inventory levels, replenishment requirements, procurement performance, and stock movement trends without manual reporting effort.
- **AI-Assisted Demand Planning:** Improve replenishment decisions with intelligent recommendations based on inventory availability, lead times, and demand patterns.
- **Intelligent Suggestions:** Reduce manual effort with AI-assisted transaction creation and process guidance.

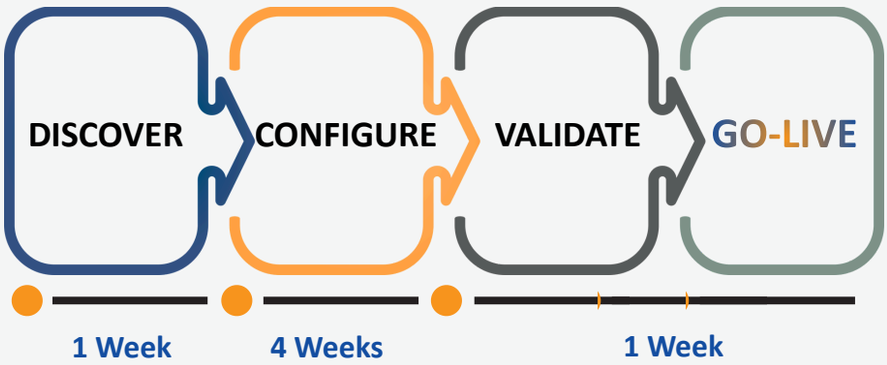

Customer Benefits

- **Optimized Inventory Investment:** Balance inventory levels while maintaining business continuity and customer service.
- **Improved Procurement Control:** Standardize purchasing processes and improve supplier collaboration through connected workflows.
- **Better Supply Chain Visibility:** Gain greater insight into inventory levels, purchasing activity, supplier performance, and replenishment plans.
- **Reduced Stock Disruptions:** Minimize stockouts and excess inventory through better planning processes.
- **Improved Productivity:** Use Copilot and standard agents to support everyday supply chain operations.
- **Lower Implementation Risk:** Adopt Business Central with greater certainty through a defined scope, timeline, and price.
